# WHOLESALE PRICE LIST

## FALL 1920

### Hardy Herbaceous Perennials

THOMAS B. MEEHAN CO.  
Dresher, Penna.

The herbaceous plants offered in this list are all strong, field grown clumps, they are not small divisions such as offered by most nurserymen. In such plants that are of a character as to make them readily divisible it would be possible to divide our plants into from two to four plants of the sizes usually offered for sale. This fact should be given careful consideration when comparing our prices with others. It is a recognized fact that these strong field grown clumps give far better results than divided or small pot grown plants.

July to September, etc., indicates the period of flowering.

PRICES: Five plants sold at the rate quoted per ten, twenty-five at the hundred rate. Cost of box and packing additional.

When cash is sent with order include 15 per cent of the amount of the purchase price to cover cost of box and packing.

| coral red, June to Sept. ....                        | 1.35 | 12.00 |

#### **HIBISCUS, MEEHAN'S MALLOW MARVELS**

We were the original introducers of this plant. It was produced by cross fertilization and selection until the desired results were obtained. Since we introduced the original plants we have greatly improved upon them by collecting seeds only from plants producing the finest types of flowers. Later the plant was offered by another firm under the name of "Giant Marsh Mallows," but there is absolutely no difference between these plants and our stock.

They commence flowering early in July and continue until late in September. The flowers on vigorous growing plants will measure from ten to twelve inches across. We offer them in four separate colors.

#### **Prices for Strong Two Year old Roots.**
